

CTSI Celebrates its 25 Year Anniversary

Lubbock-based technology provider has delivered custom business solutions since 1985

Computer Transition Services, Inc. (CTSI), a provider of business computing solutions on the South Plains, celebrates its twenty five year anniversary this month.

Since its founding in Lubbock on February 1, 1985 by Craig Alley and David Baucum, CTSI has delivered a full complement of business technology services meeting the technological and organizational needs of clients across a range of industries, including agriculture, education, financial services, healthcare,

and a variety of other West Texas companies.

“Over the last twenty five years, CTSI has remained strong throughout the many changes in technology,” said David Baucum, President, CEO, and Co-Founder of CTSI. “I attribute our success to two things: First, an unparalleled staff that maintains knowledge of cutting edge solutions. Second, the steadfast support of our clients with whom we have formed long-term, mutually beneficial business partnerships.”

Having steadily grown from two employees to thirty, CTSI remains a leader and innovator on the South Plains technology scene. The company continues to be at the forefront of the IT industry through strategic investment in people, processes, and technology. They also hold many accomplishments in technology including being the first business in Texas to receive the CompTIA Security Trustmark Certification.

The Chamber's Leadership Lubbock class, several members of the board of directors, business member representatives and Ambassadors attended the ground breaking for the Lake Alan Henry pipeline project on Tuesday, March 23. Construction on the first phase of the project will begin April 1, and the pipeline should be complete by 2012.

Ferguson is Business of the Month

(From Page 9) educational, and environmental activities,” Turner said. “We are involved in many different organizations and activities throughout the West Texas area.”

Ferguson currently employs 22 associates in the Lubbock area. The employees range from warehouse associates, truck drivers, counter sales associates, showroom consultants, inside sales associates, and managers.

Turner said Ferguson strives for providing their customers with new technology and innovative products to better serve the West Texas area including water conservation products, tankless water heaters, green products, and water free products.

“At Ferguson, we are passionate about what we do,” Turner said, “but we are also passionate about our community.”
